

## National LGV driver training with on-site DVSA testing

The National Logistics Academy is a UK-wide network of privately owned, well-established, quality LGV training schools, many with their own DVSA approved driving and Module 4 test centres. Collectively we have over 150 modern, DVSA compliant, training vehicles with qualified instructors, and we all work to the same exacting standards, to achieve excellent pass rates.

The National Logistics Academy has produced the first

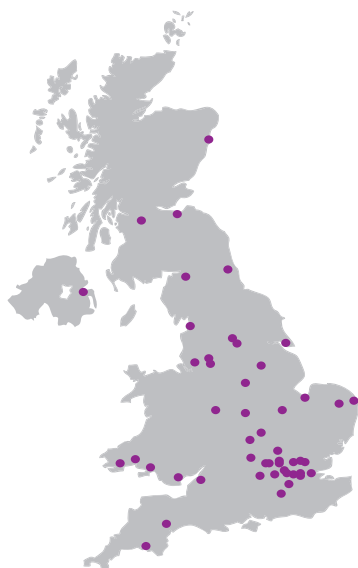

ever set of Industry-leading training materials to support learners in achieving their LGV licence and developing professional driving skills.

## Apprenticeship option – Levy or 90% government funding

The LGV training can be delivered as part of a 12-month apprenticeship programme for both new and existing employees. Larger businesses can use their Apprenticeship Levy to fund the full apprenticeship. Smaller businesses can access government funding for 90% of the training costs. Either way you are getting a fantastic training package with little or no impact on your training budget!

## National delivery

LGV driver training is delivered at centres throughout the UK by members of The National Logistics Academy.

## Our professional LGV Driver and Initial Driver CPC package covers everything required to qualify as a Category C (also known as Class 2) driver:

- Driving assessment (optional)
- Medical and provisional licence application
